

CLAIM

- [1] A talking device, which is provided with a bone conduction speaker, an air conduction microphone and a wireless circuit and capable of: fitting to its user's body; and, connecting to a cell phone by wireless through said wireless circuit.
- 5 [2] The talking device using said bone conduction speaker as set forth in claim 1, wherein both said bone conduction speaker and said wireless circuit are packed in a head portion of an ornamental pendant.
- [3] The talking device using said bone conduction speaker as set forth in claim 2, wherein: said air conduction microphone is contained in a buckle portion; and, said buckle portion serves to connect said head portion of said pendant with a strap.
- [4] The talking device using said bone conduction speaker as set forth in claim 3, wherein said head portion of said pendant is detachably mounted on said strap through said buckle portion.
- [5] The talking device using said bone conduction speaker as set forth in claim 4, wherein a battery for energizing each of said bone conduction speaker, said air conduction microphone and said wireless circuit is disposed in said strap.
- [6] The talking device using said bone conduction speaker as set forth in claim 3, wherein said buckle portion is attachable to a user's pocket.
- [7] The talking device using said bone conduction speaker as set forth in claim 1, wherein said talking device functions to link said wireless circuit to said cell phone.
